RE: **Site Source Control (SSC) Work Plan: Addendum No. 3**
Shallow Collection Trench East of the Stormwater Lagoon
General Motors Powertrain - Bedford Plant, Bedford, Indiana

This memorandum, submitted as SSC Work Plan: Addendum No. 3, provides the outline for the work to be conducted in the installation of the shallow collection trench east of the stormwater lagoon.

These drawings were developed as additional drawings to be added to the existing Site Source Control Drawing set. As discussed at our October 28, 2004 meeting at the Site, the design of this system is similar to the Parcel 3/205 design.
